

Courtagen Presenting new data at the 2014 Cyclic Vomiting Association Conference in Milwaukee, WI

Woburn, Mass., June 27, 2014-- Courtagen Life Sciences, Inc. announces the presentation of data and case studies at the **Cyclic Vomiting Association Conference** being held in Milwaukee, WI from June 27-29, 2014.

Richard Boles, M.D., Courtagen Medical Director, will deliver a lecture on the association of mitochondrial dysfunction with cyclic vomiting syndrome and discuss novel findings from Courtagen's nucSEEK® Comprehensive Sequence Analysis of the Nuclear Mitochondrial Genome.

About Courtagen Life Sciences, Inc.

Courtagen is a privately-held life sciences and molecular information company that converts genomic data into actionable clinical information for the diagnosis of neurological and metabolic disorders. Specifically, Courtagen focuses on mitochondrial disorders, epilepsy, and intellectual disability, including autism spectrum disorders. Courtagen's state-of-the-art Next-Generation Sequencing clinical laboratory integrates genotype, phenotype, and disease mechanism data using cloud-based computing and custom analytical methods to provide the most comprehensive results for clinicians, patients, and their families to better understand and treat their disease. More information can be found at www.courtagen.com.
